Dear Sirs:

In regards to the How-To SAT program by Mike Sokol, I wish to unequivocally state that it is probably the most productive, cost-effective thing I have initiated at our Church. I would recommend it even to the most experienced sound technicians involved in church sound. Mike went through our system from start to finish. He found some fundamental things that were actually set up incorrectly during the initial installation of our system. He fine tuned the system from top to bottom. He worked with musicians and left them with a better understanding of the overall production dynamics of their music. The musicians now have a better appreciation of the importance of working with their sound technician.

The educational portion of the package was phenomenal. As I said, even the most seasoned sound technician will learn from Mike Sokol. Mike's warm professionalism and knowledge is almost beyond all expectations.

In short, Mike fixed our problems; fine tuned our system, educated the sound staff and musicians, made suggestions for improvement now and in the future, and made some great friends here at the First United Methodist Church, Mineola, TX.

John L. Broadway III
Sound Technician
